Mostofa Meem

Dhaka, Bangladesh

CAREER OBJECTIVE

I'm a Backend Software Engineer with 2.5+ years of experience building production-grade, high-performance systems using Go, Java, and Python. My focus goes beyond implementing APIs—I enjoy solving complex engineering challenges around concurrency, distributed systems, performance optimization, and reliability.

I leverage modern AI-powered development tools like Cursor, Claude Code, and Z.ai (GLM) to help teams and founders turn ideas into production-ready software faster. By combining AI-assisted development with strong engineering principles, I build scalable APIs, microservices, and backend systems that are not only quick to ship but designed to perform and evolve over time.

EXPERIENCE

04/2025 - Present **bKash Voucher** **Exabyting**

- Designed and developed a **bKash voucher** to create, manage, and purchase gift cards across multiple merchants and outlets.
- Implemented secure and seamless **bKash payment gateway** integration to ensure smooth and reliable purchase flows.
- Utilized **RabbitMQ** for asynchronous service-to-service communication and real-time notifications.
- Integrated **Redis** caching to reduce database load and improve API response time.
- Implemented **CI/CD pipelines** to enable automated testing and smooth, reliable deployments.

Technologies: Java 21, Spring Boot, REST APIs, MySQL, Redis, RabbitMQ, CI/CD

03/2024 - 04/2025 **Foodi | TN-MAP** **TechnoNext Software Ltd**

- Designed and implemented a **data synchronization service** to maintain consistency across multiple databases within the OpenStreetMap ecosystem.
- Integrated **RabbitMQ** for event-driven communication, enabling real-time notifications and reliable data propagation across services.
- Developed high-performance **REST APIs in Go** to facilitate seamless service-to-service communication.
- Worked with large-scale **mapping and routing technologies**, including tile engines, OSRM (Open Source Routing Machine), and OpenStreetMap.
- Implemented **gRPC-based services** to support rider-sharing functionality, improving inter-service communication efficiency.
- Monitored and debugged production systems using **Elastic APM and Grafana** to ensure system reliability and performance.

Technologies: Go, Microservices, Docker, REST, gRPC, RabbitMQ, Unit Testing, Elasticsearch (APM), Grafana

EDUCATION

2025 - Present **Mawlana Bhashani Science and Technology University**
M.Engg in CSE

2/2019 - 8/2024 **Mawlana Bhashani Science and Technology University**
BSc(Engg.) in CSE

5/2015 - 6/2017 **Rangpur Govt. College**
HSC (Science)

SKILLS

- **Languages:** Go, Java, Python SQL, C/C++
- **Frameworks:** Spring Boot, FastAPI, Gin
- **AI Tools:** Cursor, Claude, Z.ai (GLM)
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Message Brokers:** RabbitMQ
- **DevOps & Tools:** Git, GitHub, GitLab, Aws, Docker,
- **Monitoring:** Grafana, ElasticSearch (APM), Swagger, Postman
- **Others:** OpenStreetMap, Microservices, Unit Testing, Domain-Driven Design, Clean Architecture, CI/CD

PROBLEM SOLVING

- Codeforces **Handle:** [Mostofa_Meem](#) **Max-Rating: 1399**
- Uva **Handle:** [Mostofa.Meem](#)
- LeetCode **Handle:** [Mostofameem](#) **Max Streak: 382 days**

Solved over 2500 problems and participated in more than 250 online and onsite contests.

ACHIEVEMENTS

- | | |
|---|-------------------------|
| • 200'th position ICPC Asia Dhaka Regional Contest 2024 | "Dead_Poets_Society" |
| • 80'th position in NCPC JU 2023 | "Checkmate" |
| • 9'th position in BREAKING CODE (IUPC) 2022 | "Akash_theke_pora_team" |
| • 2998'th (Round 2) in Meta Hacker Cup 2023 | "Mostofa Meem" |

PROJECTS

Event Management System

Link

Event Management System is a full-stack web platform for creating and managing events with role-based access control.

- Role-based access control (RBAC) — control who can create, manage, and view events.
- Event lifecycle management — from creation to completion Participant tracking with guest count support.
- Auto-recreate recurring events via the Hot Events scheduler.
- Integrated **Google OAuth 2.0** (via Goth) alongside JWT-based authentication, supporting both social and credential-based login flows.
- Containerized the full stack with **Docker Compose** and configured a **CI/CD pipeline** for automated deployment to AWS EC2.

Technologies: Go, PostgreSQL, Redis, React, TypeScript, Docker, JWT, OAuth2, AWS (EC2), CI/CD

CO-CURRICULAR ACTIVITIES

2022 – 2024	Trainer, Programming Club Trained junior members in competitive programming, mentoring them in problem-solving techniques, algorithmic thinking, and contest preparation.	MBSTU
2021 – 2024	Team Captain of CSE Football Team Led the department football team to: • 2× Champion & 1× Runner-Up – Intra-Department Football Tournament • 1× Champion – Inter-Department (VC Cup) Football Tournament	MBSTU
